Letter to support the funding and developments of Wildlife Foxton Trust

On behalf of the New Zealand Landcare Trust, I strongly support the developments and proposals of the Wildlife Foxton Trust to obtain funding to construct a wildlife centre on the bank of the Manawatu River loop at Foxton and funding to aid the enhancement of the Manawatu River loop and the Manawatu Estuary Ramsar site.

I regard any environmental enhancement works undertaken by this group (especially when they are likely to have benefits to water quality and biodiversity) to be of the utmost importance on a regional and national scale and therefore be a very worthy candidate for funding. Their focus on educating about an environment that is identified as having international importance and their focus on the maintenance and enhancement of this area is admirable.

The plans and the enthusiasm of the Wildlife Foxton Trust will undoubtedly be a fantastic example of how a community group can have a very positive influence on the environment for the regional and national benefit.

Yours faithfully,

Melinda Dresser
