MAVtech SUPPORTS THE PURPOSE OF THE WILDLIFE FOXTON TRUST

The MAVtech Trust supports the aims and plans of the Wildlife Foxton Trust – specifically, to create a centre that will showcase native New Zealand wildlife for the education and interest of all New Zealanders and overseas visitors. MAVtech Trust has had many dealings with the key people involved in this project and we are confident they can achieve what they set out to do.

We believe the proposed facility will deliver significant social and cultural benefits to the community, in particular through introducing local young people to the area's wildlife and natural environment and overall ecology. The centre will also deliver economic benefits through promoting visitor interaction with this, and other, local tourist experiences.

MAVtech is the New Zealand's audio-visual museum located in the historic Town Hall in Avenue Road. The Museum was established 1992 and is a registered Charitable Trust.

Yours sincerely
